
Records relating to South Australia in France

ARG 1
Series List

This artificial grouping is based on copies of records relating to South Australia held in various official repositories and private collections in France. The initial survey to locate the records, and the arrangements for, and supervision of, the microfilming were undertaken by an officer of the Archives Department (as it then was) in 1963, who was seconded to the Archives Nationales with the assistance of a French Government bursary.

Most of the records deal with the Baudin expedition. Other subjects covered are the detention of Matthew Flinders in Mauritius; the internment of William Light at Verdun; the activities of Edward Gibbon Wakefield in Paris; and the seizure of the French ship *Ville de Bordeaux* by the South Australian Government.

A series of 36 microfilms was planned.

Reels 1-25: records at the Archives Nationales, Paris

Reel 25 (part): a) records at the Archives de l'Age; near Charente; b) records at that time at the Archives du Ministere des Armees (Marine) Service Central Hydrographique, Paris.

Reels 26-31: records at that time at the Archives de Ministere des Armees (Marine) Service Historique, Paris.

Reel 32: a) records at the Museum National d'Histoire Naturelle Bibliotheque Centrale, Paris; b) records at the Archives du Port de Lorient; c) records at the Bibliotheque Nationale, Paris.

Reels 33-34: records at the Museum d'Histoire Naturelle, Le Havre.

Reel 35: further records at the Archives Nationales, Paris; b) records at the Bibliotheque Municipale de Caen; c) a further item from the Bibliotheque Nationale, Paris.

Reel 36: further records at the Archives Nationales, Paris; b) records at the Ministere des Armees (Terre) Service Historique, Chateau Vincennes; c) records at the Archives Municipale, de la Ville de Verdun, Meuse; d) a final item from the Archives Nationales, Paris.

In the event, the material planned for reels 30 and 31 (certain of the personal dossiers of members of the Baudin expedition) was forthcoming only in the form of brief extracts, owing to privacy regulations. Reels 30 and 31 were therefore severely curtailed. The material is on a single spool, labelled '30-31'.

Authority was received (see GRG 56/7, subject file 202) to supply copies to other libraries. Libraries that have purchased copies are listed in the description of series 1, below. Purchasing institutions may not have retained the same reel numbers.

The group has been enlarged by the addition of material in the form of photographic and xerographic prints some of which are prints made from the microfilms and some are new material) and by papers connected with the English translation of Baudin's journal, published by the Libraries Board of South Australia in 1974.

Mention should be made of a further manuscript pertaining to the Baudin expedition, which is held not in France but in a private collection in Australia, namely a narrative by Milius. A copy of this has been obtained and accessioned as D5607(Misc)

Le Havre, Museum.

[The film consists of six main items. Further adjustments may be worth considering prior to the making of a duplicate negative.

Item 1.Extract from a study by Messieurs Peron and Lesueur ... on the seals of the southern regions. 5p. Ms.

Further considerations: No further work necessary.

Legibility: Satisfactory in all five pages.

Item 2. Five small zoological notebooks of Peron. Approx.250p. Ms

Further considerations: Typewritten introductory frame to Bk.1 is upside down.

This could be cut and re-righted. Title pages of Bks.1,2 and 4 are upside down.

These could be cut and re-righted.

Legibility: Pp.30-37 in Bk.1 are over-exposed and illegible. 5 pp. in Bk.2 are only partly legible. Bks 3, 4 & 5 are faint in places, possibly owing to the originals being faint. Out of approximately 250pp. about 200 are satisfactory.

Item 3. Three notebooks of zoological descriptions by Peron. Approx. 400p. Ms.

Further considerations: First frame upside down. Could be cut and re-righted.

Legibility: 3 pp. illegible owing to blurring during filming. 2 pp. partly illegible. Out of approx. 400 pp., about 395 are legible. Quality mostly good.

Item 4. Voyage de Decouvertes ... Bk.5 general remarks on the southern lands ... 54 + 24 p. Ms.

Further considerations: No further work possible. The first 54 pages are one way up, the next 24 another.

Legibility: the quality of the first 54 pages is good. The succeeding 24 are faint. All are legible.

Item 5. Report on the English settlements ... Fair copy. 16p. Ms.

Further considerations: No further work necessary.

Legibility: All 16 pp. are legible.

Item 6. Notes kept by Citizen Stanislas Levillain ... 61p. Ms.

Further considerations: No further work necessary.

Legibility: About 50% legible.]
